Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I want to select the best crop for my land. • I need accurate recommendations based on soil and weather. • I want to increase my crop yield and profit.	THINKS • Which crop is suitable for my soil condition • Will the weather affect my crop production? • How can I reduce resource wastage and improve productivity?
--	---

PERSONA
NAME: Farmer
(Role / User Type): Primary User

DOES • Collects soil and environmental data. • Uses the system to get crop recommendations. • Follows the recommended farming practices to improve yield.	FEELS • Worried about crop failure due to unsuitable conditions. • Confused by changing climate and soil conditions. • Confident and satisfied when receiving accurate recommendations.
