Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Symbol Name	Description
□ (Oval / Rounded Rectangle)	External Entity	A person or system outside the project that provides or receives data. Example: Farmer (User).
□ (Rectangle with numbered header)	Process	Performs an operation on the input data. Example: 1.0 Crop Recommendation System.
— (Solid Rectangle)	Data Store	Stores information for future use. Examples: Crop Database, ML Prediction Model.
→ (Arrow)	Data Flow	Shows the movement of data between entities, processes, and data stores. Examples: Soil Data, Crop Information, Recommended Crop.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.

Data Flow Diagram – OptiCrop: Smart Agricultural Production Optimization Engine
